

The *Akeron* Range Of Fluorescent Luminaires-At A Glance

akeron (U.K.) Ltd., 15 Terminal Close, Shoeburyness, Essex. SS3 9BN. Telephone / Facsimile (01702) 297101

The AKERON 'MB' series of wall lights have been designed with specifications suitable for Berths, Lounges, Kitchens, and other positions in leisure cabin boats, trawlers, tugs and ferries.

For general lighting the MB4 - MB8 - and MB15 are identical in appearance with their opal diffusers but provide 4 watts, 8 watts, or 15 watts light outputs from a 24 volt DC supply or from 220 - 250 volts at 50 or 60 Hz.

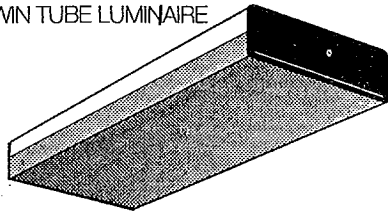

For Berths, the dual purpose lighting and shaver socket mirror version retains the same configuration and style.

Its use as an EMERGENCY LIGHT

In selected positions to provide light when the main source fails, any one of the 'MB' series can be supplied with an integral battery pack. This facility is designed to provide two to three hours EMERGENCY LIGHTING. Subsequently, the batteries are recharged by the main source when it takes over.

For larger ships, with AC electrical power sources at either 50 or 60 Hz., and with a remote maintained emergency power system, separate battery packs would not be required.

ML Series
TWIN TUBE LUMINAIRE

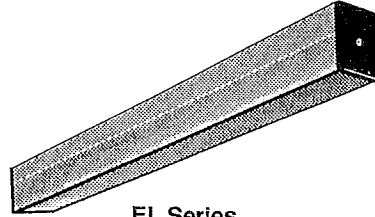

The 'ML' SERIES

For larger area lighting - the ML twin tube with 20 watt or 40 watt tubes would be an appropriate choice for even radiation of relaxing light, in lounges - dining rooms passage ways - foyers - leisure centres and halls to mention only a small and obvious selection of environments.

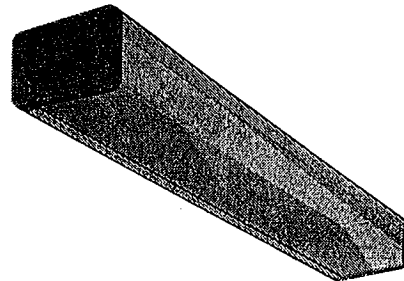

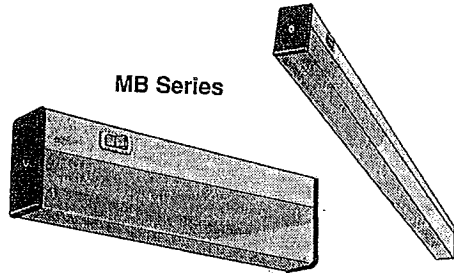

The 'EL' SERIES

The single tube 'slimline' version of the 'ML' series with provision for a 20 or 40 watt tube.

EL Series
SINGLE TUBE LUMINAIRE

MB Series

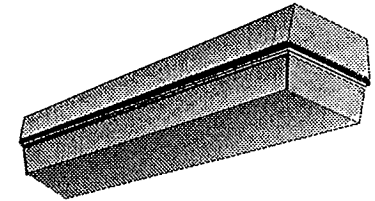

CL Series
SINGLE TUBE CORNER LUMINAIRE

DIFFUSERS - The standard diffusers fitted to all the AKERON lights are opal acrylic with excellent colour keeping and temperature resistant qualities. Diffusers for lights no longer manufactured by other companies can be produced by AKERON against drawings and specifications.

The 'GP' SERIES

For corrosive environments, where the ingress of moisture or dust must be repelled, the GP range of fittings made from self extinguishing GRP and 'unbreakable' polycarbonate are ideal.

GP Series
CORROSION RESISTANT, MOISTURE & DUSTPROOF LUMINAIRE WITH POLYCARBONATE DIFFUSER

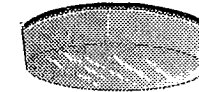

As a leading U.K. supplier of fluorescent lights for ships large and small, off-shore platform rigs, commercial establishments, and domestic environments, the **AKERON COMPANY** presents, in this brochure, its standard range of fluorescent lights and diffuser replacement capability. All the lights described are designed for operation from 110v to 250v at 50Hz. or 60Hz. - or from 12v or 24v D.C. according to the particular version in each series.

Circular / Square Ceiling Lights

Examples of smaller lighting units 6" to 8" square / diameter designed for accommodation, lounges, cabins, stairways, toilets, bars, dining rooms.

The 'CL' SERIES

According to the way in which lighting units are to be arranged to produce the most effective spread of light and attractiveness, the CL single tube (20 or 40 watt) Corner Luminaire could be used in conjunction with either or both of the ML and EL series.

The 'SN' SERIES

For a different ceiling style this group of recessed luminaires is designed to have single or twin 20 or 40 watt tubes.
