"Where can we put these before they get lost?"
The answer could be in one or other of the handy plastic mini bins illustrated on this leaflet.

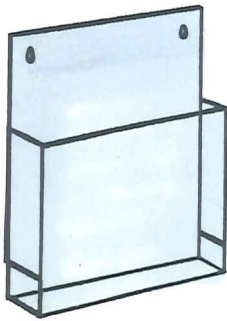

In small parts stores this vertical plastic bin, mounted in rows, or in standard racks, can provide an excellent means for storing small parts. In offices - papers, stationary, pens, and so on, can be held conveniently and readily away from the desk.

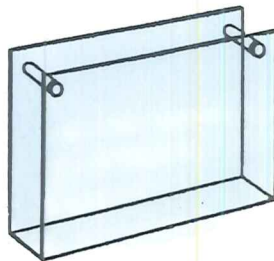

Or perhaps the horizontally orientated version might be more convenient for you..

Many applications come to mind, in factories - holding job cards, conveying varieties of small parts to different locations on the production line. In fact, these versatile, lightweight bins would seem to be an essential item of equipment, for busy people.
